

LightLock has been developed primarily for sealing fire extinguishers after their annual test and certification. The low break strength allows easy and manual removal in cases of emergency.

APPLICATIONS

- Fire extinguishers
- Other regulated emergency devices
- Cash bags
- Small courier bags

FEATURES

- Has a low breaking strength
- Available in six standard colours
- Can be printed with customer name & sequential serial no.
- Variable loop design

BENEFITS

- Easy to remove manually
- Colour coding to improve security and to identify the year of fire extinguisher is tested
- Improved security
