

OctoLock

OctoLock is a fixed length seal with a hard octagonal locking head made from polypropylene plastic. It has an Acetal jaw and unique double locking mechanism specially designed to enhance its security against tampering.

APPLICATIONS

- Vehicle doors
- Tankers – petroleum, bulk food & liquid
- Shipping containers
- Bonded warehouse

FEATURES

- Fixed loop design
- Patented double locking mechanism
- Acetal locking jaw with a higher melting point than polypropylene
- A heavy duty octagonal head
- Pre-determined break point on the seal

BENEFITS

- Allows movements of the door locking mechanism without applying strain on the seal
- Enhanced the level of security
- Strong octagonal head protects Acetal jaw from tampering
- User friendly, easy manual removal by hands
