

TwinLock is a fixed length seal made from polypropylene plastic. It has an acetal jaw and unique double locking mechanism specially designed to enhance its security against tampering.

## APPLICATION

- Vehicle doors
- Tankers - petroleum, bulk foods & liquid
- Shipping containers

## FEATURES

- Fixed loop design
- Patented double locking mechanism & ribbed locking head
- Acetal locking jaw with a higher melting point than than polypropylene
- Pre-determined break point on the seal

## BENEFITS

- Allows movements of the door locking mechanism without applying strain on the seal
- Enhanced level of security
- User friendly, easy manual removal by hands
