TwistLock

TwistLock is an easily applied seal for all types of utility meters. It has an one directional rotatable locking mechanism to prevent extraction of sealing wire from its body. The rotating handle can be snapped off after application to prevent any manipulation. The transparent polycarbonate body reveals any sign of tampering.

APPLICATIONS

- Utility meters
- Transport meters
- Gas & fuel meters
- Telephones
- Utility boxes

FEATURES

- Transparent PC body
- ABS twister with option of colours
- · One directional locking mechanism with sealing wire

BENEFITS

- · Clearly expose any tampering attempt
- Different colours for coding and easy identification
- · Avoids re-insert and replacing of sealing wire
